Forward Collision-Avoidance Assist 2 (FCA 2)

Forward Collision-Avoidance Assist 2 (FCA 2) monitors your surroundings and warns you of potential collisions. It assists with emergency braking and avoidance steering to prevent collisions with vehicles, pedestrians and cyclists, whether turning at intersections or changing lanes.

Images for reference only.

Highway Driving Assist II (HDA 2)

Highway Driving Assist II (HDA 2) enables your car to steer, accelerate and brake automatically with improved control performance and a new steering angle control method. The system now includes a direct Hands-On Detection (HOD) sensor for better recognition of the driver's grip on the steering wheel.

[Exterior](#)[Interior](#)[Convenience](#)[Performance/Charging](#)[N Line](#)[Hyundai SmartSense](#)[Customising/Specifications](#)[Power your world](#)

Blind-Spot Collision-Avoidance Assist (BCA)

Blind-Spot Collision-Avoidance Assist (BCA) warns you if there is a risk of collision with a rear side vehicle in the blind spot while changing lanes. When forward exiting a parallel-parking spot, if there is a risk of collision with a vehicle approaching from behind, it automatically assists with emergency braking.

Images for reference only.

Remote Smart Parking Assist 2 (RSPA 2)

Remote Smart Parking Assist 2 (RSPA 2) helps remotely park or exit a parking spot. It automatically assists with steering, accelerating, decelerating and shifting using the vehicle's sensors. It automatically assists with braking when an object is detected in the vehicle's path. You can perform "remote operation" using the smart key when you are outside the vehicle.

Advanced Driver Assistance Systems (ADAS) are designed to provide assistance with the operation of a vehicle, drivers must drive with caution at all times. Functions may not operate depending on the surroundings and driving conditions. Refer to the instruction manual for details. Actual specifications may vary depending on the trim, powertrain and specifications selected.
