

SANTA FE

We have a passion for progress.

The “can-do” spirit is at the heart of Hyundai’s heritage. It’s the attitude of progressing, no matter what. From humble beginnings, this vision has driven us to seek new challenges, encapsulated since our founding in the name ‘Hyundai’ – meaning ‘modern times’.

It’s the persistent curiosity for what lies ahead. Of always chasing the next. What was once a man’s desire for better is today the ethos of an entire company. As our founder said: “How does one know it’s impossible if one hasn’t tried it?”

Progress doesn’t happen by chance. We’re always pushing the borders of the possible, building tomorrow’s technology today, and powering the future with an ever-evolving range of zero-emission engines, seamless in-car connectivity and more.

We’ve come a long way. And we won’t stop here.

And a passion for success.

The Hyundai SANTA FE has been hailed ‘Large SUV of the Year’ in the prestigious 2022 What Car? Car of the Year Awards. Providing ample seating for a family of seven, SANTA FE drew praise from the What Car? judges for a raft of improvements, which have elevated the elegantly styled, high-technology SUV to another level.

What Car? Editor, Steve Huntingford, explains: “Hyundai has proven that small changes can make all the difference, with the addition of hybrid and plug-in hybrid power options turning this already good large SUV into a great one. Running costs are reduced and refinement improved. Plus, you still get a well-controlled ride, outstanding value for money and a nicely finished interior with seating for seven.”

Power, poise, and purpose.

SANTA FE, brings refined power and poise to driving. Advanced safety systems, 7 seats, a strikingly designed body and efficient powertrains give you the drive of your life.

Car shown: SANTA FE Hybrid Ultimate in Magnetic Grey Metallic.

With more power, control, and fewer emissions, SANTA FE delivers sophisticated performance on every level. Passenger comfort is matched by safety and convenience. Smart Sense safety systems adapt and adjust to road conditions and personal preferences. Intuitive controls are there to make driving easier, more relaxed and safer, no matter the journey. Improved load space, superior handling and refined power means SANTA FE takes everything in its stride, and the sculpted body means it does it all in style. For the challenges ahead, the 7 seater SANTA FE is purpose personified.

Car shown: SANTA FE Hybrid Ultimate in Magnetic Grey Metallic.

Make a clean getaway.

The SANTA FE delivers efficiency and flair with lower emissions, Hybrid powertrains, adaptive terrain suspension and automatic transmission throughout the range.

SANTA FE Ultimate. Car shown not to UK Specification.

With a choice of flexible powertrains and drive transmissions, the SANTA FE brings clean, responsive power to your drive. The refined 1.6T GDi engine comes in two formats, both delivering efficient power via automatic transmission. The Plug-in Hybrid has a larger 13.8 kWh battery and is available in four-wheel drive only. For superb towing capabilities, a diesel powertrain, coupled with a DCT transmission, is available.

Signature styling.

Fine lines and daring design give the SANTA FE a bold and distinctive presence on the road.

Car shown: SANTA FE Premium.

The commanding front of the SANTA FE features an imposing grille and sculpted bumper for a muscular stance. There are T-shaped light clusters for all-round visibility and increased light-throw. Alloy wheels enhance proportion and poise, and the rear bumper completes the look with high visibility T-form rear lights.

Floating high console with shift-by-wire transmission standard across all trim levels. Aluminum finish standard with Luxury pack.

Quilted Nappa leather seat available on Ultimate trim with Luxury Pack.

The inside story.

High specification driver controls and information systems in a spacious interior.

Full 12.3" TFT cluster standard on Ultimate trim.

The interior of the SANTA FE has been imagined for today's driver. Increased visibility from a lowered dashboard gives a clear view of the immediate surrounds, and a stunningly designed centre console includes a 10.25" touchscreen. With access to BlueLink, Apple Car Play/Android Auto and Bluetooth, you have a choice of how you connect to your vehicle. The 12.3" instrument cluster provides you with performance information. Mood lighting adds an atmospheric touch to truly personalise your interior space. To drive forward or in reverse, simply use the shift by wire buttons. This modern layout adds convenience and extra space to the interior.

Control through connectivity.

Take charge of a bigger world with personalised control.

Bluelink

The SANTA FE's internal command systems take connectivity to another level. With voice control and personalised driver profiles, the SANTA FE automatically adjusts connectivity and comfort for individual preferences. Bluelink and Bluetooth® sync your phone to in-car smart systems for hands-on or remote control and the wireless charging pad allows cable-free charging. With intuitive audio and navigation control from the 10.25" touchscreen display, driving and entertainment systems are clearly laid out for immediate access and instant control.

Wireless phone charging pad standard across all trim levels.

KRELL premium audio standard across all trim levels.

eCall standard across all trim levels.

10.25" touchscreen audio visual navigation standard across all trim levels, also used as the surround view monitor on Ultimate trim.

Street Smart for Total Safety.

When it comes to safety, forewarned is forearmed. With Smart Sense safety systems, risks are recognised and autonomous action taken before hazards arise.

Lane Follow Assist (LFA): LFA helps prevent accidental lane departure and keeps your vehicle safely centered within the lane. Using a forward camera to recognise the intended lane, LFA will automatically provide corrective steering input to help maintain the centre path. This not only detects road lines but also the road edge.

Forward Collision Avoidance Assist - Junction Turning (FCA-JX): Smart sensors and cameras at the front of the SANTA FE link to smart systems to warn of vehicles, cyclists or pedestrians in your path and alert drivers to oncoming vehicles when turning across lanes, automatically applying the brakes when necessary.

Highway Driving Assist (HDA): For additional safety, Highway Driving Assist keeps the SANTA FE at your pre-set speed and maintains road position in your lane. HDA monitors the distance to the vehicles ahead, reducing speed automatically when the gap closes. When the safe distance is restored, HDA resumes the pre-set cruising speed.

Remote Smart Parking Assist (RSPA): Parking in a tight space is simple with RSPA. Using the smart key fob controls, the SANTA FE can be driven or reversed into and out of narrow bays from up to 4m away — at the touch of a button.

Rear Cross-traffic Collision Avoidance Assist (RCCA): Sensors detect vehicles approaching from both sides when the SANTA FE is in reverse, avoiding collisions in congested or reduced visibility environments such as car parks.

Reverse Parking Collision - Avoidance Assist (PCA): Using the rear camera and ultrasonic sensors whilst reversing at low speeds, a warning is issued on detecting the possibility of a collision with a pedestrian or obstacle. If necessary, brakes are applied.

The SANTA FE protects its passengers from risks all round. With 360° awareness of traffic, pedestrians, and road conditions, the SANTA FE feeds multiple streams of information to the driver with audible alarms and kinetic adjustments where necessary. Taking care of your safety, vigilant systems allow you to focus on the road ahead as the space around you is monitored. Forward Collision Avoidance Assist, protect you from hazards in front and rear-facing sensors alert you to pedestrians or objects behind. SANTA FE comes with technology to make every journey safer and more enjoyable.
